· Protection of hands:

The glove material has to be impermeable and resistant to the product/substance/preparation
 Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/
 the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the
 degradation

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality
 and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the
 resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the
 application.

· Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be
 observed.

· Eye protection: Not required.
